

Enhancing Patient and Provider Experience

PHIX is a local non-profit founded by El Paso health leaders. In the past, health providers shared your health records by telephone and fax. Through PHIX, your providers can now electronically locate your health records safely and securely in a matter of minutes. This flow of information between your doctors, hospitals, labs, and other providers gives a full picture of your health history.

Who has access to my information?

Your health information will only be accessed on a need-to-know basis by your healthcare provider. This enables your providers to make timely decisions.

Is it secure?

Yes. PHIX follows all federal and state guidelines, including HIPPA to make sure that only authorized users have access to your data. We work diligently to make sure your information is protected.

Do I have to participate?

No, you may "opt-out". If you opt-out, your health information will not be available through our PHIX network for your healthcare provider to access. Your decision to opt-out will not affect your ability to receive care.

To "Opt-Out" talk to your healthcare provider
